8. Anomaly Detection

[!] Possible port scan from 192.168.1.17 (28 distinct destination ports)

[!] Possible port scan from 192.168.1.4 (29 distinct destination ports)

[!] Possible port scan from 192.168.1.19 (26 distinct destination ports)

[!] Possible port scan from 192.168.1.9 (28 distinct destination ports)

[!] Possible port scan from 192.168.1.18 (27 distinct destination ports)

[!] High SYN ratio: 149/246 (60.6%) — possible SYN flood

Recommendations

- Investigate IPs exhibiting port scanning behaviour. Consider adding firewall rules or IDS signatures.
- High SYN rates detected. Enable SYN cookies or rate-limiting at the perimeter firewall.
